TREALIX

Sugar of Life

CHARACTERISTICS

A well balanced combination of a natural and unique disaccharide (**Trehalose**) with vegetable proteins similar to the composition of skin's Natural Moisturizing Factor. It **restores normai hydration** especially in dry, reddened or stressed skin.

Trealix is an innovative **high performance moisturizing** and **soothing cosmetic ingredient**, suitable for skin care formulations.

PROPERTIES

- Hydrating properties: 6 times more effective than reference tested products.
- Skin hydration: +40 % immediate increase and +25 % after 6 hours.
- Long lasting moisturizing effect.

FOCUS INFO

INCI NAME

Trehalose (and) Hydrolyzed Vegetable Protein

SPECIFICATIONS

Appearance:	clear liquid
Colour:	from yellow to amber
Odour:	characteristic
Density (at 25°C):	1.200 - 1.230 g/ml
pH:	5.0 - 6.0
Dry residual 105°C:	50 - 60%
Dosage:	1.0 - 5.0%

COSMETIC APPLICATIONS

- Moisturizing daily creams
- Products for dry skin
- Anti aging and mature skin products
- After sun lotions
- After shave balms
- Baby care products

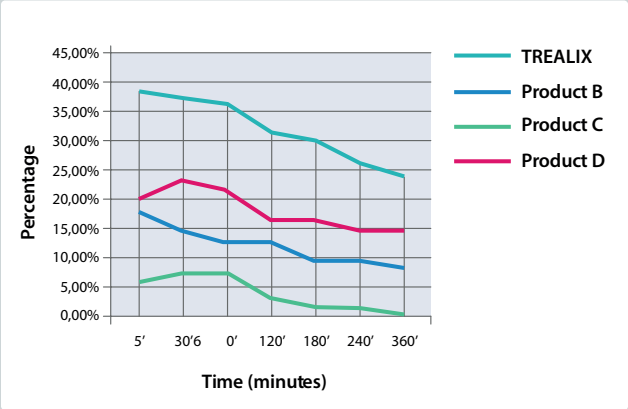
TREALIX

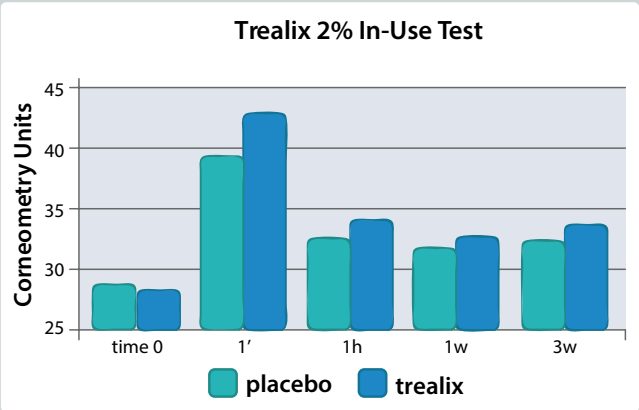
EFFICACY *IN VIVO* STUDY

PROTOCOL: 20 volunteers applied different products on the forearms and the measurements were performed at 0,5,30,60,120,180,240 e 360 minutes after application, by Corneometer.



RESULTS: Trealix induces a significant immediate increase of skin hydration and long lasting action, higher respect to each of any other reference (6 times more).

PROTOCOL: 20 volunteers applied a placebo cream and a cream containing 2% Trealix and the measurements were performed at TO, after 1 hour, 1 week and 3 weeks, by Corneometer.



RESULTS: Trealix has a significant moisturizing effect in both absolute terms and versus placebo (1 v +17%, 1 hour +10%, 1 week +6%, 3 weeks +5%).

MOISTURIZING EMOLLIENT CREAM

LSIN 1008*

INGREDIENTS	PHASE	w/w%
PHYTOCREAM®2000 (SINERGA)	A	10.00
Simmondsia Chinensis (Jojoba)	A	5.00
Butyrospermum parkii	A	4.00
Olea Europeae Oil Unsaponifiables	A	5.00
Parfums	A	0.60
SF18-350	A	1.00
Tocopherol, Lecithin, Ascorbyl Palmitate, Citric Acid	A	0.05
Water	B	to 100
FENIOL (SINERGA)	B	1.00
Disodium EDTA	B	0.15
Glycerin	B	3.50
TREALIX (SINERGA)	B	4.00
RED ALGA GEL (SINERGA)	B	4.00

METHOD

Weight phase A and heat up to 70°C.
Weight phase B and heat up to 70°C. Add phase A to phase B and mix until homogeneous aspect. Cool down under low stirring to 30°C.

CHARACTERISTICS

Aspect	Consistent emulsion
Colour	Ivory
pH	5.5
Viscosity	7.000 - 10.000 m-Pas

*Formulation tested in Sinerga Research Centre according to stability and laboratory manufacturing procedures.
